

PREMIERE LINK

AN EXCLUSIVE STRONGLINK MODULE

FOR ADOBE PREMIERE USERS

Adobe Premiere project management, whether on an enterprise level or on a departmental level, continues to become a larger and more complex issue as more and more video content is produced, modified, and repurposed.

The ability to easily retrieve content or elements that have been utilized within Adobe Premiere projects is a daily requirement in today's video workplace, and keeping all of the projects on spinning disk can be difficult to manage, backup, and track.

The Struggle ends TODAY, with PremiereLINK, an exclusive StrongLINK module for Adobe Premiere Users.

STRONGLINK

StrongLINK is a software-defined data and storage management solution that addresses long-standing obstacles to data storage cost-containment, risk reduction, and productivity optimization.

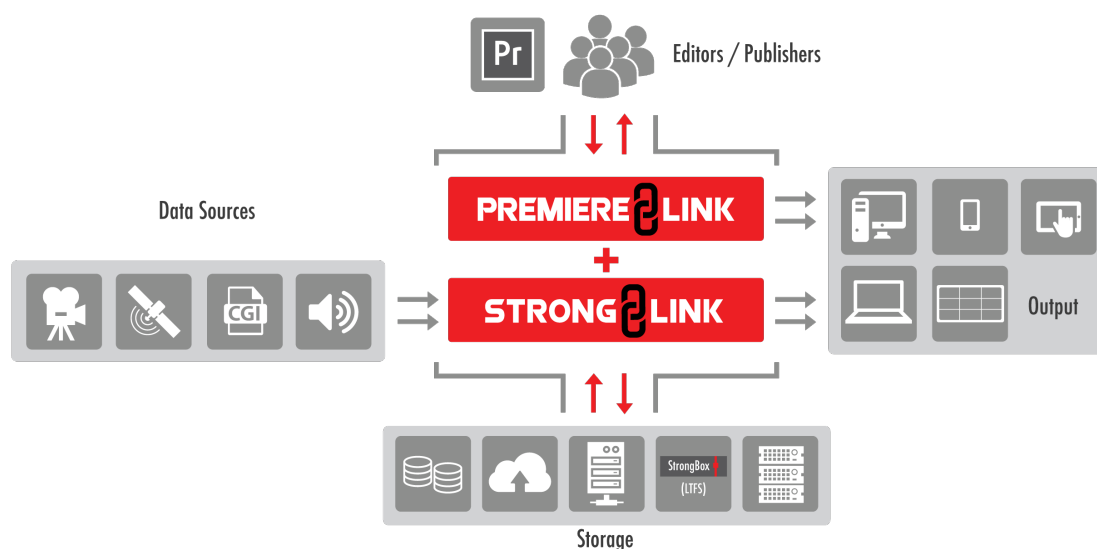

PREMIERE LINK

Expanding upon the power of StrongLINK, integration with PremiereLINK extends the management of Adobe Premiere projects, sequences, and timelines to StrongLINK Data Sources.
